TEMA / THEME

In gevolg Onderwyswitskrif 6 van 2001 vertolk opvoeders 'n sleutelrol vir die suksesvolle implementering van inklusiewe onderwys. Ongelukkig ondervind baie onderwysers uitdagings met die implementering en bestuur van inklusiwiteit, omdat hulle nie opgelei is om leerders met leerhindernisse te ondersteun nie.

Gedurende hierdie opleidingsessie sal aandag gegee word aan die volgende leerhindernisse wat algemeen in die klaskamer voorkom: ADHD, disleksie, diskalkulie, disgrafie, dispraksie, outisme, asook ouditiewe verwerkingsversteuring. Daar sal ook gekyk word na strategieë wat toegepas kan word om elkeen van hierdie leerhindernisse prakties in die inklusiewe klaskamer te ondersteun.

According to Education Whitepaper 6 of 2001, educators play a key role in the successful implementation of inclusive education. Unfortunately, many educators experience challenges implementing and managing inclusivity because they have not been trained to support learners with barriers to learning.

During this training session attention will be given to the following most common barriers to learning that manifest in our classrooms: ADHD, dyslexia, dyscalculia, dysgraphia, dyspraxia, autism and auditory processing disorder (APD). We will also focus on strategies to support learners with these barriers in the inclusive classroom.
