**Do we really need all the current technology hype in education? What has led to all these demands?  
How must the role of the teacher change?**

The empowerment session will focus on exploring and defining current local and world concepts influencing the use of technology and new methodologies in the classroom. Important theories and approaches like blended learning, flipped classrooms, use of e-learning in general, visible learning and the demands of the so-called industrial Revolution will be explored in practical terms to close the gap between theory and practice. The emphasis throughout is on using what you and your learners already have and ensuring that it meets 21st century education demands.

Die bemagtigingsgeleentheid fokus op huidige beste praktyke. Daar word na nuwe konsepte en tegnologieë soos 'blended learning', 'flipped classrooms', e-leer en die eise van die sogenaamde 4de Revolusie verwys. Die aanbieding beklemtoon die beste gebruik van wat jy en jou leerders reeds tot julle beskikking het om te verseker dat dit aan die eise van onderrig in die 21ste eeu voldoen.
